The UN Decade of Education for Sustainable Development – towards 2014 and beyond –

Alexander Leicht,
Chief, Section of ESD, UNESCO, Paris

United Nations
Educational, Scientific and
Cultural Organization

Where do we stand?

- Rio+20: “We resolve to promote education for sustainable development ... beyond the United Nations Decade of Education for Sustainable Development.”
- Increased presence of ESD internationally and nationally.
- Major challenges:
 - from pilot to policy
 - from small scale to large scale
 - from margin to mainstream

United Nations
Educational, Scientific and
Cultural Organization

Two strategies

- Integrate ESD into **education**.
 - “ESD makes education relevant today.”
- Integrate ESD into **sustainable development**.
 - “Sustainable development cannot be achieved by technological solutions alone.”
- Both agendas, both ‘languages’, both stakeholder groups are needed.
- This is guiding also the preparation of the World Conference on ESD in 2014.

United Nations
Educational, Scientific and
Cultural Organization

Towards a post-2014 framework

- Should focus on scaling up action.
- Should address all levels and forms of education.
- Should involve broad partnerships.
- Should have clear objectives.

United Nations
Educational, Scientific and
Cultural Organization

Building block I: Advances in policy

- Integration of ESD into policies at the international level
 - Successes to build on include ESD in the Rio+20 outcome document
 - A possible objective: integrate ESD into the SDG process and the post-2015 education agenda

United Nations
Educational, Scientific and
Cultural Organization

Building block I: Advances in policy

- Integration of ESD into policies at the national level
 - Successes to build on include examples from Japan, China, Canada (Manitoba), etc.
 - A possible objective: integrate ESD into national policies in education and sustainable development (with a possible focus on climate, biodiversity, etc.)

United Nations
Educational, Scientific and
Cultural Organization

Building block II: Advances at the practice level

- Integrating ESD across the whole education institution
 - Successes to build on include UNESCO ASPnet schools, CEE's activities in India, etc.
 - A possible objective: solicit commitments from X schools in X countries

United Nations
Educational, Scientific and
Cultural Organization

Building block II: Advances at the practice level

- Empowering the individual learner
 - Successes to build on include the online Young Masters Programme in Sweden, etc.
 - A possible objective: create easy-to-access online ESD learning opportunities for all ages

United Nations
Educational, Scientific and
Cultural Organization

Building block III: Implementation and support mechanisms

Successful DESD work has also been done
in these areas:

- Partnerships and multi-stakeholder networks
(with an emphasis on the local level)
- Research activities
- Monitoring and evaluation

United Nations
Educational, Scientific and
Cultural Organization

Post-2014 – post-2015

- A focused global programme is dedicated to ESD, and
- ESD is integrated into relevant post-2015 processes.
- A major push comes from the World Conference on ESD in 2014.
- ESD is seen as a key paradigm for quality education and for progress in sustainable development.

United Nations
Educational, Scientific and
Cultural Organization
